## Shoulder Cradle

The difference is  
night and day.

**Shoulder Cradle** is a unique modular system that provides secure immobilization and a wide range of abduction angles to allow stable comfortable support both day and night.

**Unique, easy-to-use modular design**

The patented design allows the Shoulder Cradle to achieve a wide range of abduction angles with specially shaped bolster.

**No metal components**

Soft, fully padded arm cradle and waist strap permit easy adjustment without the discomfort of metal components.

**Versatile immobilization without the use of a neck strap**

Stable, comfortable support in various levels of abduction, and in neutral rotation during sleep without the use of neck strap.

**15°** or more

### Universal Fit

Easily converts from right to left.  
One size fits most adults.

### Open design for cold therapy treatment

Easy to use open design allows for unobstructed use of hot or cold.

### Comfortable Immobilization 24/7

Maintaining proper, secure position of the shoulder while at rest is key to rehabilitation. The medium and large bolsters provide comfortable, secure support for back and side sleepers.

### Unique arm cradle design offers firm support

Lightweight, polycarbonate core provides rigid support without uncomfortable or hard-to-adjust metal components. Patient-friendly soft goods permit easy adjustments and ideal comfort, day and night.

Shoulder Cradle is indicated for post-operative immobilization in 15° of Abduction or greater for:

- Shoulder hemiarthroplast
- Total shoulder replacement
- Shoulder reconstruction
- Superior labral repair
- Shoulder debridement

Also may be used for protocols involving stabilization following:

- Fractures to the proximal Humerus, Elbow & Forearm
- Bankart repair
- Rotator Cuff repair
- Biceps tendon surgery
- Shoulder dislocation
- Elbow ligament and tendon repair
