

# AMNIOS® CRYOPRESERVED LIQUID AMNION

# AMNIOS® RT ROOM TEMPERATURE LIQUID AMNION

Amnios and Amnios RT are liquid tissue allografts derived from human amniotic fluid intended to contribute to an environment conducive for the regeneration of healthy tissue.<sup>1</sup>

## BIOLOGICS

- Amnios and Amnios RT contain growth factors and cytokines
- Published literature documents that amniotic fluid may contain important growth factors, extracellular matrix molecules, hyaluronic acid, fibronectin, laminin, prostaglandins, and cells<sup>1,2</sup>
- Reported benefits of amniotic fluid have included reduced inflammation, reduced fibrosis/scarring, decreased pain, and anti-adhesion properties<sup>1</sup>
- The fluid may be used independently or in combination with autologous tissue or other forms of allograft tissue
- Aseptically processed and tested per USP <71> sterility tests
  - Amnios RT is sterile filtered and then low dose gamma irradiated
- Packaged with a shelf life of 1 year
  - Amnios must be stored at -70°C or colder
  - Amnios RT may be stored at ambient temperature

### AMNIOS

Part Number	Volume
930-TS	0.5ml
931-TS	1.0ml
933-TS	2.0ml

### AMNIOS RT

Part Number	Volume
930-RT-TS	0.5ml
931-RT-TS	1.0ml
933-RT-TS	2.0ml
