Cryo/Cuff™ IC Cooler

Integrated cold and compression is clinically proven to help reduce pain, post-operative swelling, and help patients regain range of motion*.

The Cryo/Cuff™ IC utilizes both gravity and motorized cold compression therapy to aid flexibility of care. An integrated pneumatic pump within the cooler lid helps provide automated cold and compression therapy. Designed with safety and ease-of-use in mind.

FEATURES & BENEFITS

- Helps deliver cold and compression therapy
- Anatomically designed cuffs to help provide cold and focal compression to the knee, shoulder, foot, ankle, and back

Ask your physician if the Aircast® Cryo/Cuff™ IC would be right for you.

* Data on file
Your medical professional recommends the use of cold therapy as part of treatment when appropriate.

The therapeutic effects of cold therapy are recognized by practitioners, as well as patients, as a useful method to help reduce the symptoms of pain while aiding comfort following trauma or surgery.

Further, the use of cold therapy is proven to help reduce the need for narcotics and IV pain relief medications, while also reducing hospital stays. Cold therapy also aids in the acceleration of rehabilitation and range of motion.

**WARNING:** This device can be cold enough to cause serious injury. Read and understand all warnings and instructions for use before using this device. Additional warnings appear in the instructions for use.

**Aircast® Cryo/Cuff™ IC**

**IDEAL FOR:** Aiding in post-operative recovery, trauma, athletic training rooms, and home-use.
