The Mayo Clinic estimates that a staggering 80% of Americans will experience back pain at some point in their life. In fact, the cost of treating spinal dysfunction has grown to $50 billion annually. As a result, patients, clinicians and third-party payers are now demanding less invasive, less expensive, non-pharmacological solutions to back pain.

**Manual Therapy**

Hands-on traction is one of the oldest forms of physical medicine and remains widely used today. However, as the pressure of today’s healthcare environment demands more treatments in less time, it becomes increasingly difficult for the clinician to deliver manual therapy treatments safely. In addition, the sheer physical strength demanded for manual traction can place many at a higher risk for job-related injuries.

**Mechanical Traction:**

The Need for Innovation

Though used for decades, mechanical traction remained a rather primitive modality done with the aid of a simple motorized pull unit. Though effective in some areas, these inflexible units were unable to replicate the nuanced manipulations of the clinician’s gentle pulls. Although other medical equipment became digitized, computerized, modernized and user-friendly, mechanical traction’s unsophisticated operating system and cumbersome belting configurations remained largely unchanged.

Until now...

Chattanooga Group’s Triton DTS® Traction System is a total redesign of the mechanical traction platform in a patient-friendly package. It features a newly engineered Triton DTS Spine Therapy Table, a state-of-the-art Triton DTS Traction Unit with treatment parameters that mimic hands-on therapy, and an easy-to-use QuikWrap™ Belting System.

### Benefits of Traction

**Clinical Benefits of Traction Therapy**

Research points to the beneficial effects of traction because it can:

- Decrease bulging and protruding discs
- Separate vertebrae
- Decrease pain

**Mechanical/Physiological Effects of Traction Therapy**

- Decompression of the Spine
  - Unload spine
- Mobilization of the Spine
  - Stretch ligaments and tendons
  - Mobilize the capsule, facet joints and intervertebral discs
- Increase range of motion
- Increase flexibility

### Intended Uses for Triton DTS® Traction System

The Triton DTS Traction System can be used to relieve:

- Protruding discs
- Bulging discs
- Herniated discs
- Degenerative Disc Disease
- Posterior Facet Syndrome
- Acute Facet problems
- Radicular pain
- Prolapsed discs
- Spinal root impingement
- Hypomobility
- Degenerative Joint Disease
- Facet Syndrome
- Compression Fractures
- Joint Pain
- Discogenic Pain

... The Answer
The heart of any clinic is the patient table, and the innovative features of the Triton DTS® Spine Therapy Table set a new industry standard.

**Triton DTS® Spine Therapy Table Features**

- **New Pelvic Tilt Section**
  - Inclines the pelvis from 0° to 20°, providing improved patient comfort in prone and supine positions for both manual therapy and mechanical traction
  - Flattens back without having to increase traction rope angles
  - Helps address pelvic asymmetry commonly noted with patients suffering low back pain
  - Provides flexion of the lumbar spine to improve positioning in traction

- **Improved Access to Cervical and Thoracic Spine**
  - Independently adjustable chest and arm sections assist in maintaining a neutral spine position for patient comfort and positioning
  - Repositionable head section tilts 35°, allowing easy access to the thoracic and cervical spine

- **Patient Stabilization**
  - Removable axilla posts provide additional fixation to the table, preventing slippage during supine traction
  - Axilla posts can be used with QuikWrap thoracic belt to secure patient with less restraint
  - Axilla posts assist patient supine or prone positioning during traction therapy

- **User Features**
  - Gas spring assist on friction-free moveable sections for easy positioning
  - Lockable smooth-gliding casters
  - User-friendly control pad for patient positioning
  - Grab bar tucks away for improved access to the patient
  - Wide cushions for improved patient comfort
  - Adjustable table height from 20’’ – 40’’ (51 cm – 102 cm)

- **QuikWrap™ Belting System**
  - Gone are the days of tedious, time-consuming canvas halter and strap belting systems. The new QuikWrap Belting System ensures quick and easy patient set-up.
  - Universal fit with hook and loop closures
  - Non-slip design holds patient securely and allows even distribution of anterior and posterior pull forces
  - Allows patient to be wrapped and set-up in under one minute, and treatment started in as little as two minutes

- **Repositionable Headpiece**
  - Contoured headpiece cradles the patient’s head comfortably in supine or prone position
  - Tilt 35°, allowing flexion in prone position or extension in supine position

- **Gas-assist Leg Section**
  - Provides additional function to the table, preventing slippage during supine traction

- **Adjustable Grab Bar**
  - Tucks away for improved access to the patient

- **Traction Unit**
  - Patient Data Card Port
  - Visual Rope Angle Indicator

- **Traction Unit**
  - Adjustable Height
  - Removable Axilla Posts
  - Independently Adjustable Chest Section
  - Adjustable Arm Rests
  - Dual Purpose Patient Interrupt Switch with optional sEMG Indicator
  - Universal fit with hook and loop closures

- **Adapter System**
  - User-friendly control pad for patient positioning

- **Improved Height System**
  - Adjustable height from 20’’ – 40’’ (51 cm – 102 cm)
The award-winning Triton DTS® Traction unit is one of the most sophisticated traction devices on the market.

**Triton DTS Traction Unit Features:**

- Fully programmable DTS pull patterns deliver pull forces that closely mimic the hand-delivered feel clinicians provide.
- Isolation of all phases of pull with independent timing for pretension, progression, traction, and regression.
- Variable speed control for ultimate patient comfort and increased treatment flexibility.
- Programmable pretension prior to initiation of traction therapy eases guarding and provides greater comfort for the acute patient.
- Five unique pull patterns add gradient, progressive range of motion and oscillations.
- Optional sEMG initiated traction begins treatment when patient relaxes to the sEMG target (please request part number 4766 when placing your order).
- Clinical Protocols™ for cervical and lumbar conditions.
- Memory storage for 80 user-defined protocols.
- Static, intermittent and cyclic traction options.
- Full-color decal graphic library includes anatomical images, common pathologies and detailed belting technique tutorial.
- Digital high resolution color touch screen interface that pivots 270°.
- Patient Data Cards record relevant treatment data such as patient treatment sessions, pre- and post-treatment patient pain scales, pain mapping, and pain types.

**Enhanced Modulated DTS Pull Patterns**

- Intermittent
- Intermittent w/ Max Gradient
- Intermittent w/ Reverse Gradient
- Progressive Range of Motion
- Cyclic
- sEMG Initiated Traction (optional)

**Standard Triton Features**

- Dual Purpose Patient Interrupt Switch with optional EMG Indicator
- Visual Rope Angle Indicator
- 6EMG Initiated Traction (optional)
Traction systems tailored to you, your clinic and your patients.

Triton DTS® systems include the innovative TRT 600 treatment platform, a state-of-the-art Triton DTS traction unit, and our exclusive QuikWrap™ belting system.

The Triton DTS Advanced System, with its cervical-specific accessories, is perfectly suited for the clinician who treats a significant number of both lumbar and cervical patients, while the inherent flexibility of the Triton DTS Basic System allows clinicians to treat a wide variety of back conditions.

**TRT DTS Advanced System**

**REF:** 8250K

- TRT600 - Triton DTS Spine Therapy Table with Stone Blue upholstery
- 2841 - Triton DTS Traction Unit package
- 7040 - Saunders Cervical Traction Device
- 48039 - Traction Clinic Package
- 2825 - QuikWrap™ Belt System
- 9296 - Stabilizer™ Pressure Biofeedback
- 42901 - Traction Bolster Set

*SEM initiated traction available with both packages for an additional charge. Please refer to part number 4766 when placing your order.

*Additional charge for non-standard upholstery color. Colors and technical specifications are shown on the following pages.

**Upholstery**

Rhino Hyde from Chattanooga Group is a unique vinyl product supported by a tough synthetic, foam-padded, 30% thicker than standard upholstery. In strict compliance with US government fire codes, Rhino Hyde is flame resistant. A superior upholstery for medical applications, Rhino Hyde is also bacteriostatic, mildew resistant, and oil resistant. Rhino Hyde is warranted for two years against manufacturing defects which lead to cracking, peeling, or delamination of properly cared for material.

Naugahyde® is a registered trademark of Uniroyal Engineered Products, LLC.

Rhino Hyde® Products are a registered trademark of Tandem Products, Inc.

*Additional charge for non-standard upholstery color.
