INTENDED USE/INDICATIONS: Intended to provide support (and immobilization) for thoracic postural extension alignment, compression fractures of the thoracic spine, early onset through variable stages of osteoporosis, pre- and post-surgical protocols, Thoracic mechanical back pain and Kyphosis.

CONTRAINDICATIONS: Pregnancy and circulation, pulmonary, cardiovascular or skeletal conditions which may worsen as a result of compression of the abdomen and/or pressure.

Prepare Brace: Open both compression Velcro® panels. Keep the shoulder straps attached and extend to maximum length.

Application of Brace: With patient standing, lift the TLSO over the patient’s head. Lower the TLSO into position and let the front and back panels hang over the torso.

Close both compression side panels so that they are even and comfortably snug on the front panel.

Adjust the sternal Y-Bar by pulling up on the release button and sliding the sternal Y-bar into position. Be sure to keep the bottom edge of the front panel aligned with the pubic bone.

Adjust the shoulder straps. Be sure to maintain the bottom edge of front panel with the pubic bone and the back panel between shoulder blades and lower back.

Removal of Brace:
1. Release the pull handle, remove one compression side panel and remove one of the shoulder straps.
2. Slide the orthosis off the other shoulder like removing a jacket or backpack.

CUSTOMIZING TLSO:
• Waist Belt: Adjust the side panels by un-hooksing the Velcro on the back panel and moving panels more center for a smaller waist, or closer to the edge of the back panel for a larger waist.
• Shoulder Straps: Trim extra length with scissors.
• Sternal Bar: May be bent as needed by using a stable edge of a table. Using both hands, bend the bar in a slow and controlled fashion to adjust to desired degree of offset. The stock sternal Y-bar is set at 15°.

MATERIALS: Sternal Bar: Aluminum, Nylon, Polyurethane; Waist Belt: Polyester, Polyurethane, Nylon, Polypropylene; Shoulder Straps: Nylon, Polyester, Polyurethane.

PRODUCT NOT MADE WITH NATURAL RUBBER LATEX.

SINGLE PATIENT USE ONLY
