

June 30, 2015

Dear Surgeon:

DJO Global recently announced that they have purchased the Biomet Cobalt™ HV bone cement and the Optivac© cement mixing accessories from Zimmer Biomet in the United States. As of today, DJO Surgical will own these products for the U.S. market.

Our priority is to continue to provide outstanding customer service and support through this transition. Both DJO and Zimmer Biomet are committed to you and your patients, and we are working together to ensure continued high-quality execution and a seamless transition.

There are no immediate changes that impact you, and there will not be any interruption to your ability to use the Cobalt products. There will be a short transition during which Zimmer Biomet will continue to provide support services for Cobalt bone cement. During this period, certain Zimmer Biomet sales representatives will service orders in conjunction with DJO Surgical sales representatives until the products have been fully transitioned. We look forward to introducing you to your new DJO sales representative in the near future.

If you have any questions regarding the transition, please contact:

- **General inquires about the transition:** Mark Russell, Vice President of Sales (512-832-9500), or DJO Customer Service (800-520-8976)
- **Cobalt bone cement orders:** Rob Delp (574-371-1011) or John Susaraba (574-372-1583).

DJO is also announcing the acquisition of the Biomet Discovery® Elbow System in the U.S.

We look forward to the opportunity to work with you during the transition. On behalf of our organizations, we would like to take this opportunity to express our appreciation for your business and let you know how much each of our companies values our ongoing relationship with you.

Sincerely,

Stuart Kleopfer
President, Americas
Zimmer Biomet

Brady R. Shirley
